7th Grade Math | Ms. Dowling | 2016-2017

Hello Mathematicians!

Welcome to another year at St. Clare!

In seventh grade math we act as mathematicians; we collaborate, build, ponder, play, critique, investigate, create, ask questions… and get our homework done on time! ☺

This year we will explore the negative side of the number line, relationships between quantities, patterns in algebra and three-dimensional geometry!

I look forward to sharing my love of mathematics with you… again!

Sincerely,

Ms. Dowling

course textbooks

- Rational #'s & Equations
- Proportions & Probability
- Shapes & Angles

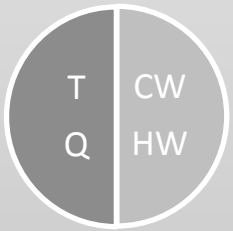
You will be responsible for your own textbooks. You will checkout a new textbook from Ms. Dowling near the beginning of each trimester. The **whereabouts** and **care** of each textbook are **YOUR responsibility.**

daily materials

- √ Math notebook
- √ Math textbook
- √ Planner
- √ Pencils & erasers
- √ Calculator
- √ iPad
- √ Homework

Being **prepared** is essential to learning! Each day, in addition to a **positive attitude** and **readiness for learning**, you must bring to class the materials listed above.

grading scale



In my class, **effort** is just as important as understanding and application of concepts. Classwork and homework will account for 50% of your grade; quizzes and tests will make up the other half.

absences

It is **YOUR responsibility** to contact your **HW Buddy** to get caught up after an absence. You have one week to turn in a missing assignment after an absence. All tests/quizzes should be made up within the week as well.
I am available before school or during lunch for extra support.

Students and Parents,

Please autograph to indicate that you have read and agree to the classroom policies outlined on the first page.

Please return this sheet by _____.

jdowling@stclarepdx.org

I agree to follow these expectations! ☺
